Data Collection Services

WeDriveU helps tech innovators rapidly scale location and communication services. Our capabilities include:

- Logistics support and infrastructure to ramp-up quickly

- Experienced managers and drivers

- Operation of vehicles and technical equipment

- Robust metrics and reporting

- Risk mitigation

MAPPING OPERATIONS

Gathering images and data for navigation, traffic or dispatching applications? We've covered every state in the continental U.S. – 600,000 kilometers for one client alone.

SIGNAL TESTING

Testing connectivity and performance for your company's voice and data services? Our experienced managers and drivers have executed tens of thousands of route collection hours for clients.

Expanding or launching a data collection initiative? Learn how WeDriveU's Data Collection Services team can help. For case studies and tips, visit:
